

Statistical Analysis of Repeated Measurements Data

Dimitris Rizopoulos

Department of Biostatistics, Erasmus University Medical Center

`d.rizopoulos@erasmusmc.nl`

April 18 – 22, 2016

Contents

1	Motivating Data Sets	1
1.1	Motivating Longitudinal Studies	2
1.2	Features of Longitudinal Data	14
1.3	Review of Key Points	26
2	Marginal Models for Continuous Data	27
2.1	Simple Methods	28
2.2	Review of Linear Regression	37
2.3	Marginal Models	46

2.4 Interpretation	52
2.5 Estimation	63
2.6 Fitting Marginal Models in R	69
2.7 Covariance Matrix	73
2.8 Model Building	84
2.9 Hypothesis Testing	87
2.10 Confidence Intervals	111
2.11 Residuals	113
2.12 Review of Key Points	129

3	The Linear Mixed Effects Model	131
3.1	The Linear Mixed Model	132
3.2	Interpretation	138
3.3	Hierarchical vs Marginal	146
3.4	Estimation	155
3.5	Mixed-Effects Models in R	165
3.6	Nested and Crossed Random Effects*	173
3.7	Mixed Models with Correlated Errors	184
3.8	Time-Varying Covariates*	190
3.9	Model Building	200
3.10	Hypothesis Testing	203

3.11 Residuals	204
3.12 Review of Key Points	214

4 Marginal Models for Discrete Data 217

4.1 Review of Generalized Linear Models	218
4.2 Generalized Estimating Equations	231
4.3 Interpretation	239
4.4 Generalized Estimating Equations in R	246
4.5 Working Correlation Matrix	249
4.6 Hypothesis Testing	260
4.7 Review of Key Points	269

5	Mixed Models for Discrete Data	271
5.1	Generalized Linear Mixed Models	272
5.2	Interpretation	274
5.3	Estimation	276
5.4	GLMMs in R	278
5.5	Model Building	280
5.6	Hypothesis Testing	282
5.7	Review of Key Points	284
6	Statistical Analysis with Incomplete Grouped Data	286
6.1	Missing Data in Longitudinal Studies	287

6.2 Missing Data Mechanisms	292
6.3 Analysis with Incomplete Data	307
6.4 Summary	329
6.5 Review of Key Points	331

7 Closing 333

7.1 Concluding Remarks	334
----------------------------------	-----

Practicals 338

Practical 1: Marginal Models Continuous	339
Practical 2: Mixed Models Continuous	348
Practical 3: Marginal Models Discrete	357

Practical 4: Mixed Models Discrete	365
--	-----

What is this Course About

Grouped data arise in a wide range of disciplines

- Typical examples of grouped data
 - ▷ *repeated measurements*: measuring the same outcome multiple times on the same sample unit (e.g., biomarkers in patients)
 - ▷ *multilevel data*: outcomes measured on sample units that are organized in different levels (e.g., patients in medical centers or students in schools)

What is this Course About (cont'd)

- Statistical analysis of grouped data
 - ▷ Features of grouped data
 - ▷ describe their distribution
 - ▷ inference using suitable regression models

Learning Objectives

- Goals: After this course participants will be able to
 - ▷ identify settings in which a repeated measurements model is required,
 - ▷ construct and fit an appropriate model to the data at hand, and
 - ▷ correctly interpret the results
- Even though the course will be primarily explanatory
 - ▷ sufficient mathematical detail will be provided in order participants to obtain a clear view on the different modeling approaches, and how they should be used in practice

Agenda

- **Chapter 1:** Motivating Data Sets

- ▷ Data sets that we will use throughout the course
- ▷ General repeated measurements settings
- ▷ Research questions

- **Chapter 2:** Marginal Models for Continuous Data

- ▷ Features of repeated measurements data
- ▷ Naive approaches
- ▷ Review linear regression
- ▷ Marginal models

Agenda (cont'd)

- **Chapter 3:** The Linear Mixed Effects Model
 - ▷ Intuition behind mixed models
 - ▷ nested and cross random effects
- **Chapter 4:** Marginal Models for Discrete Data
 - ▷ Review generalized linear models
 - ▷ Generalized estimating equations

Agenda (cont'd)

- **Chapter 5:** Mixed Models for Discrete Data

- ▷ Generalized linear mixed effects models
- ▷ approximations of the integrand & integral
- ▷ interpretation of parameters

- **Chapter 6:** Statistical Analysis with Incomplete Grouped Data

- ▷ Problems with incomplete data
- ▷ Missing data mechanisms
- ▷ Valid inferential approaches

Structure of the Course & Material

- Lectures & software practicals using R
- Material:
 - ▷ Course Notes
 - ▷ R code in soft format
- Within the course notes there are several examples of R syntax – these are denoted by the symbols ‘R> ’

Software Requirements

- The up-to-date version of R and Rstudio; downloadable from
 - ▷ <http://cran.r-project.org/>
 - ▷ <http://www.rstudio.com/>
- Additional required packages
 - ▷ **lme4, MCMCglmm, geepack,**
 - ▷ **MASS, shiny, corrplot**

Software Requirements

- Up-to-date versions of these packages and their dependencies can be installed using the command

```
install.packages(c("shiny", "nlme", "lattice", "lme4",  
                  "MCMCglmm", "geepack", "MASS", "corrplot"),  
                dependencies = TRUE)
```

- Up-to-date version of a modern web browser, e.g.,
 - ▷ Mozilla Firefox (<https://www.mozilla.org/firefox/>)
 - ▷ Google Chrome (<http://www.google.com/chrome/>)

Software Requirements

- A [shiny](#) web app that replicates all analyses in the course including also some additional illustrations
- The app is available on GitHub and can be invoked using the following two-step procedure (assuming internet connection is available)
 1. Start R
 2. Run the command

```
shiny::runGitHub("Repeated_Measurements", "drizopoulos")
```

this will open a new web browser window (or tab) with the app

- Note: in order the app to be functional you should **not** close R
