Chapter 7

Practicals

-

Chapter 8

Closing

8.1 Concluding Remarks

- **When we need mixed effects models?**

  ▷ to analyze correlated data structures, e.g.,

      * longitudinal data

      * hierarchical data

      * . . .

- **How mixed models work?**

  ▷ a model for the responses given random effects

  ▷ a model for the random effects

- **What we did not cover**

  ▷ mixed models for discrete longitudinal data

  ▷ Generalized Estimating Equations

  ▷ . . .

The End!
